- Coppermine

## Objective

I am seeking a position that will offer me an opportunity to use the skills gained in previous positions as part of an organization that is geared toward helping others, teamwork, and keeping pace with technology; all without forcing me to sacrifice all my family time.

## Work Experience

### *Consultant / Web Developer*

3/1997 - Present Blue Phoenix Consulting

Since 1997 I've worked as a consultant / web developer. Originally started as a part-time venture, this has been my career since 06/2006. My primary style in developing websites and online applications is simply this: Make the user experience pleasant by developing clean, well organized sites that load quickly and where any page is accessible in a minimum number of clicks.

### *Patrolman First Class*

10/2003 - 6/2006 H.W.H. Police Department, Helena-West Helena, AR

I was initially hired in as a part-time dispatcher for, what was intended to be a side job. Due to my previous experience in computers I was asked to start maintaining the department computer systems. In May 2004 I became a Patrolman as there was no budget for 'computer guy.' My time was usually evenly divided between IT duties and patrol duties. By January 2005 I was promoted to Patrolman First Class, several months before I was even eligible for such a rank.

### *Web Developer*

5/2002 - 2/2003 RE/MAX Properties, Little Rock, AR

Maintained several pet projects for the broker. Many consisted of Access database development for tracking leads, rental property and FSBO properties. Developed a lead generating site and assisted with marketing it to other realtors.

### *Office Manager*

4/2001 - 1/2002 The Mortgage Group, Inc., Little Rock, AR

Originated and processed residential mortgage loans. I was also in charge of training new loan originators in the ways of sub-prime lending, this company's primary market.

### *Network Administrator*

9/2000 - 4/2001 RAIN Arkansas, Little Rock, AR

While at RAIN I functioned as the Network Administrator for a small Novel network. Some of my other duties were: website design, computer repair/upgrading, database programming/maintenance (Access 97), data entry, grant searching, volunteer management, and soliciting local businesses for donations of computer hardware and software.
